

WHAT IS CLAIMED:

1. A folder blank comprising a first panel and a second panel, said first panel being connected to said second panel and said first and second panels capable of being folded to form a folder sized to hold documents of the type ordinarily found in a business office, said first panel comprising an elongated tab extending at least partially along one side of said folder blank, said tab comprising a length, a width and an edge surface that extends along said length of said tab, said tab being foldable along a first fold line extending along the length of said tab and extending parallel to said one side of said folder blank, whereby when said tab is folded along said first fold line any identifying indicia which may be printed on the tab on one side of said first fold line can be seen from the front of the folder and any identifying indicia which may be printed on the tab on the other side of said first fold line can be seen from the back of the folder, said second panel including an elongated portion extending at least partially along said one side of said folder blank, said elongated portion comprising a length, a width and an edge surface that extends along said length of said elongated portion, said elongated portion being foldable along a second fold line extending along the length of said elongated portion and extending parallel to said one side of said folder blank, whereby when said tab is folded along said second fold line said elongated portion reinforces at least a portion of said second panel.

2. The blank of Claim 1, wherein a distance from said first fold line to said tab edge surface is longer than a distance from said first fold line to said second fold line.

3. The blank of Claim 1, wherein a distance from said second fold line to said elongated portion edge surface is longer than a distance from said first fold line to said tab edge surface.

4. The blank of Claim 1 further comprising an adhesive strip disposed between said tab edge surface and said first fold line.

5. The blank of Claim 1 further comprising an adhesive strip disposed between said elongated portion edge surface and said second fold line.

6. The blank of Claim 1 further comprising a single adhesive strip disposed between said tab edge surface and said first fold line and said elongated portion edge surface and said second fold line.

7. The blank of Claim 1 further comprising a set of removable labels attached to said blank.

8. The blank of Claim 7 further comprising a removable portion.

9. The blank of Claim 8, wherein said set of removable labels are attached to said removable portion.

10. The blank of Claim 8, wherein said removable portion is disposed along said one side of said folder blank and between said tab and said elongated portion.

11. The blank of Claim 7, wherein said set of removable labels are embedded in said blank.

12. The blank of Claim 11, wherein said set of removable labels are embedded in said second panel of said blank.

13. The blank of Claim 1, wherein a gap is defined between said tab and said elongated portion.

14. The blank of Claim 1 further comprising an indicia receiving portion formed on said second panel of said blank.

15. The blank of Claim 14, wherein said indicia receiving portion comprises a photo paper stock portion.

16. The blank of Claim 15, wherein said photo paper stock portion is adhered to said blank.

17. The blank of Claim 16, wherein said photo paper stock portion is adhered to said second panel of said blank.

18. The blank of Claim 1 further comprising identifying indicia printed on at least a portion of said tab such that a first portion of said indicia is on a first side of said first fold line and a second portion of said indicia is on a second side of said first fold line and said first portion of said indicia and said second portion of said indicia being substantially identical, said indicia comprising a repeating pattern of a plurality of color bars.

19. A folder blank comprising a first flap and a second flap, said first flap and said second flap being separated by a first flap fold line, said first flap having a first length and a first width, said second flap having a second length and a second width, said blank also comprising a first tab and a second tab, said first tab being foldable about a first tab fold line and said second tab being foldable about a second tab fold line, said

first tab fold line being disposed such that when said first tab is folded about said first tab fold line an indicia which may be printed on said first tab on one side of said first tab fold line can be seen from a front side of said folder and any identifying indicia which may be printed on said first tab on an opposite side of said first tab fold line can be seen from a back side of said folder.

20. The folder blank of Claim 19 further comprising a third flap that is connected to said second flap such that said second flap is interposed between said first flap and said second flap and a second flap fold line separating said second flap and said third flap.

21. The folder blank of Claim 20, wherein said first tab and said second tab are on opposite sides of said folder blank.

22. The folder blank of Claim 20, wherein said first tab and said second tab are positioned on opposite sides of said first flap and said first tab fold line and said second tab fold line is substantially perpendicular to said first flap fold line.

23. The folder blank of Claim 22 further comprising adhesive disposed on at least one of said first flap and said third flap in such a location that said first tab and said second tab can be adhered to said third flap when folded.

24. The folder blank of Claim 20, wherein said first flap fold line and said second flap fold line extend substantially parallel to each other.

25. The folder blank of Claim 20 further comprising a pair of removable portions that extend substantially perpendicular to said second flap fold line.

26. The folder blank of Claim 20, wherein said first tab and said second tab are on opposite sides of said folder blank.

27. The folder blank of Claim 26 further comprising a pair of removable portions that extend substantially perpendicular to said first flap fold line.

28. The folder blank of Claim 19, wherein said first tab and said second tab are positioned along a single side edge of said blank.

29. The folder blank of Claim 28, wherein a gap is defined between said first tab and said second tab.

30. The folder blank of Claim 28, wherein a removable portion is disposed along said single side edge of said blank and said removable portion is positioned between said first tab and said second tab.

31. The folder blank of Claim 19, wherein said first flap fold line extends across at least a portion of a full width of said first flap but said first flap fold line does not extend across said full width of said first flap.

5 32. A folder blank comprising a first panel and a second panel connected to said first panel, said first panel and said second panel together forming a folder for holding documents, said first panel including an elongated tab on one edge, said tab having a length and a width, said tab having a fold line extending along the length of said tab parallel to said one edge of said first panel, said fold line dividing the width of said
10 fold line said first portion is the front side of a completed folder tab and said second portion is the back side of the completed folder tab, and identifying indicia printed on at least a portion of said front side and substantially identical indicia printed on a corresponding portion of said back side of said completed folder tab, said indicia comprising a repeating pattern of a plurality of color bars.

15 33. The blank of Claim 32, wherein said plurality of color bars comprises bars of four colors and said pattern repeats four times.

34. The blank of Claim 32, wherein said folder blank has a first color and said first color forms one bar of said plurality of color bars.

20 35. The blank of Claim 32, wherein said plurality of color bars are monochromatic.
